Received signal · Demo data
78%
Good
0% · Weak
100% · Strong
What does signal strength mean?
Signal strength indicates how well a mobile device receives the network signal. A higher percentage means better reception.
Sample network
4G LTE

Network Performance
Demo data · College lab prototype
Sample values only. Not live network monitoring.
Download Speed
Demo data
42 Mbps
Speed of receiving data from the network
Upload Speed
Demo data
12 Mbps
Speed of sending data to the network
Latency
Demo data
28 ms
Network response delay · Lower is better
About these measurements
Mbps = megabits per second. ms = milliseconds. These are example readings for a connected 4G LTE network.
Demo snapshot: 10:20 · No speed test is running.

Demo data · College lab prototype
Sample values only. Not live network monitoring.
Call Quality
Demo data
Good
Clear audio with minimal interruption
Connection Status
Demo data
Connected
Stable 4G LTE connection
Dropped Calls
Demo data
1 of 20 calls
5% drop rate in the sample call log
Calls completed
95%
Demo data: 19 completed, 1 dropped. Based on 20 sample calls, not an active call.
